Household Income

Income is defined as the total annual gross income of all family and non-family members 18+ years old living within the household. All sources of income must be counted from all persons in the household based on anticipated income expected within the next 12 months. Possible types of income include but are not limited to: wages, salary, tips, bonuses or commissions payments, public assistance, social security/SSI, child support, regular gifts, unemployment, income earned on assets (savings, IRA, etc.) and some types of financial aid.

To calculate income, take the monthly amount that you and the people in your household are paid before taxes and multiple by 12. Include all wages, including regular salaries and overtime. If you are self-employed, use the previous 12 months of pretax income.

Vermonters whose annual household income falls at or below the following levels are eligible for this increased incentive offer.
